

## Capture Aerosol at the Source

SafetySuction brings high-volume evacuation right up to the tip of aerosol producing devices. Aerosols can contain blood, bacteria, and viruses. SafetySuction's proven technology captures 93% aerosol as it is produced. Aerosols and liquids safely evacuate down the standard high-vac suction line.

*Computer Analyzed Measurement Imaging with and without SafetySuction<sup>®</sup>, Indicating Over 93% Reduction in Aerosols.*

- ✓ Made in the USA
- ✓ High-volume aerosol evacuation at the tip of your scaler
- ✓ Available to fit many types of ultrasonics
- ✓ Reduce contaminated aerosol by 93%
- ✓ Reduces water buildup by 80%
- ✓ Removable handpiece is autoclavable, supporting long-term infection control

Aerosol Reduction

### The SafetySuction<sup>®</sup> Difference is Clear

with SafetySuction

without SafetySuction

## Why SafetySuction<sup>®</sup>

The new SafetySuction captures 93% of aerosols at their source. The standards of dentistry are ever-changing. Routine use of masks, gloves, and other surface protection are no longer enough with the presence of droplet-spread diseases. Measures need to be taken to reduce the amount of aerosol created and distributed in order to prevent the spread within the operatory area.

*Maximize protection by minimizing aerosol.*
