USER-FRIENDLY CROWN LENGTHENING/ FREE GINGIVAL GRAFTING PROCEDURES TO ENHANCE EXCELLENT RESTORATIVE DENTISTRY

APRIL 5 • FULL DAY • HOUSTON, TX

Are you facing challenges with subgingival margin placement? Do you desire to manipulate gingival tissue effortlessly? Are you ready to enhance the value of procedures in your practice? Subgingival margin placement can be a daunting task for restorative dentists, as it directly impacts patient satisfaction with the aesthetic outcome. However, by gaining confidence and expertise in a range of surgical procedures, we can overcome these limitations while prioritizing patient comfort and acceptance.

Join our interactive workshop to experience the art of manipulating gingival and bony margins, achieving exceptional restorative results with precise endpoints and the establishment of essential biologic width. We will cover various techniques, from traditional flaps to cutting-edge micro-invasive dental lasers. Additionally, we will review billing and coding practices to ensure effective reimbursement and case acceptance.

Learning Objectives:

- Gather data to determine suitable cases and select appropriate surgical techniques
- Understand the anatomical limitations associated with surgical restorative access
- Identify the right surgical flap or laser technique based on case selection, including flap manipulation, closed laser procedures, and suturing methodologies
- Explore the utilization of dental lasers, including different wavelengths and corresponding techniques
- Provide free gingival grafting to increase attached gingivae and ridge anatomy
- Develop post-operative evaluation protocols to assess wound healing and identify potential complications

Samuel B. Low, DDS, MS, M.Ed, Professor Emeritus, University of Florida, College of Dentistry; He is past President of the American Academy of Periodontology. He is a current President of the Academy of Laser Dentistry. He was selected "Dentist of the Year" by the Florida Dental Association, Distinguished Alumnus by the University of Texas Dental School, and the Gordon Christensen Lecturer Recognition Award. He is a Past President of the Florida Dental Association and past ADA Trustee.
