

Choose which meetings, and dates you wish to attend and send in the form below to register

**Surgical Extraction and Suturing & Flap Design Courses**

- Cincinnati, OH • Jul. 12 & 13
- Philadelphia • July 19 & 20  
*(Includes both courses + advanced suturing)*
- New York City, NY • Aug. 3 & 4
- Denver, CO • Aug. 17 & 18
- Tampa, FL • Sept. 6 & 7
- Phoenix, AZ • Sept. 21-22
- Minneapolis, MN • Oct. 5-6
- Dania Beach, FL • Nov. 9-10
- Indianapolis, IN • Nov. 15-16
- Arlington, VA • Dec. 6-7

**Complex Endodontic Treatments and the Use of High Magnification Dentistry**

- Minneapolis, MN • Friday, Oct. 10  
Enova Illumination,  
6305 Sandburg Rd,  
Minneapolis, MN 55427
- Ft. Lauderdale, FL • Sat., Nov. 9  
S. Fla. Dental Meeting  
1825 Griffin Rd.  
Dania Beach, FL 33004

**3 Great Hands on CE courses:**

Two courses presented by  
**Dr. Thomas Wiedemann**  
MD, PhD, DDS

MODERN ADVANCED ATRAUMATIC AND SURGICAL EXTRACTION TECHNIQUES, COMPLICATIONS MANAGEMENT, SOCKET GRAFTING, GBR AND OTHER IN-OFFICE ORAL SURGERY PROCEDURES FOR GENERAL DENTISTS

10 CEU

UNDERSTANDING SUTURES AND FLAP DESIGNS FOR GENERAL DENTISTS

6 CEU

One course presented by  
**Juan Carlos Ortiz Hughes**  
DDS, CEAS II, AEP

COMPLEX ENDODONTIC TREATMENTS AND THE USE OF HIGH MAGNIFICATION DENTISTRY

8 CEU

**SURGICAL EXTRACTION TECHNIQUES AND SUTURES AND FLAP DESIGN PROCEDURES**

**2 DAYS OF HANDS-ON COURSES**

Presenter  
**Thomas G. Wiedemann**  
MD, PhD, DDS

Look inside for meeting locations, dates, and times

**COMPLEX ENDODONTIC TREATMENTS AND THE USE OF HIGH MAGNIFICATION DENTISTRY**

Presenter

## Modern Advanced Atraumatic and Surgical Extraction Techniques, Complications Management, Socket Grafting, GBR and Other In-Office Oral Surgery Procedures for General Dentists

AGD subject code 310

**One Day 8 Hr. Hands-On Workshop Plus 2 Hr. Online Webinar**

**10 CEU**

Webinar Pre-Requisite Prior to Hands-On Course • Hands-On Course Capacity: 20 Students

### COURSE OBJECTIVES:

This action-packed extraction course, with two hands-on sessions and lectures, will provide a step-by-step blueprint for successful atraumatic extraction techniques with hand instruments and piezoelectric devices as well as appropriate flap designs for surgical extraction procedures. The associated webinar will provide pre-op patient evaluation and safe patient selection and you will leave prepared to return to your practice and immediately provide these new techniques and procedures. You will learn how to select and demonstrate proficient use of the appropriate armamentarium (Periotomes, Proximators, Apical Retention Forceps, Piezotomes vs. conventional instruments) in order to remove and section teeth as well as determine and demonstrate case-appropriate basic and advanced suturing techniques. The course has been carefully designed to integrate didactic, and visual aides, and extensive hands-on attendee participation with a wide range of different exodontia and bone graft procedures (GBR, socket grafts) for each individual patient.

### LEARNING OBJECTIVES:

By the end of the course, doctors will be able to:

- Understand and apply practical working knowledge in non-surgical and surgical techniques used in modern exodontia
- Apply and select specific instruments for minimally invasive and alveolar ridge protecting extraction procedures to facilitate immediate dental implant placement
- Manage common real-life complications associated with tooth extractions
- Analyze and anticipate surgical challenges in tooth extractions
- Feel comfortable in risk assessment in medically compromised patients requiring tooth extractions
- Perform current simple protocols of GBR, including socket preservation, as related to pre-implantological extractions
- Perform other frequent and common oral surgery procedures in the general dental practice
- Allow participants to refine and update all surgical skills

### THE 2 HOUR EXTRACTION WEBINAR INCLUDES:

Pre-requisite to hands-on course & should be reviewed by all participants in preparation and prior to the course.

- Guidelines for the preoperative assessment of common medical conditions relevant for oral surgery procedures
- Provides preoperative clinical and radiographical evaluation criteria of different tooth and bone conditions prior to tooth extractions and advanced local anesthesia techniques relevant in the surgical management of acutely infected teeth
- Implications and relevance of the informed consent

Both of these courses are under the direction of **Dr. Thomas Wiedemann MD, PhD, DDS**

**BIOGRAPHY:** Thomas G. Wiedemann, MD, PhD, DDS, Clinical Associate Professor and full-time faculty at New York University, College of Dentistry, Department of Oral & Maxillofacial Surgery. Prof. Wiedemann's career consists of more than 25 years of surgical and educational experience in an academic setting and successfully operating a private practice providing the full spectrum of Oral & Maxillofacial Surgery and Implant Dentistry. He has special interests in dental emergency care, pain management, minimal invasive surgical strategies, and techniques of the full scope of Oral & Maxillofacial Surgery. He has acquired extensive expertise in implant surgery with multiple implant systems since 1995. He is well versed in innovative concepts of alveolar ridge augmentation and reconstruction and soft tissue regeneration, CBCT guided- and piezo-surgery. He is the author of many publications, speaker in national and international conferences on oral surgery and implantology related topics, and serves on the editorial board of several renowned and peer reviewed scientific journals.

## Understanding Sutures and Flap Designs for General Dentists

AGD subject code 310

**Half Day 4 Hr. Hands-On Workshop Plus 2 Hr. Online Webinar**

**6 CEU**

Webinar Pre-Requisite Prior to Hands-On Course • Hands-On Course Capacity: 20 Students

### COURSE DESCRIPTION:

This course is under the direction of Thomas G. Wiedemann, MD, PhD, DDS.

Oral Surgery procedures are an integral part of everyday dental practice. General dentists perform extractions, periodontal surgery, and implant placements that often require specific suturing skills. However, some clinicians may experience challenges such as suture loosening, flap dehiscence, tearing, and the inability to stabilize flaps. Improper suturing can lead to complications and even treatment failures. Whether dentists have been practicing for years or a relatively short period of time, mastering suturing and soft tissue management is an essential skill that will predictably improve the final post-surgical results. The goal of this hands-on course is to train general dentists in predictable and correct suturing techniques and flap designs. Attendees will learn about different types of suture material and needle configuration and indications for their use. The hands-on portion of the course will include lots of firsthand "over the shoulder" tips, tricks, and instructions. Participants will be confident with different suture types and experience the exercise of the most commonly used suturing techniques and flaps in dental practice. Doctors at any level who are interested in improving their suturing skills will be provided with practical information on how to suture properly and improve surgical treatment outcomes.

### LEARNING OBJECTIVES:

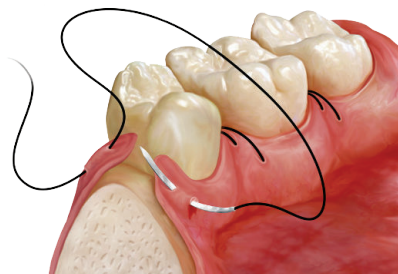

- Comprehend predictable wound healing, suture mechanics, and the importance of correct suturing
- Select the proper threads, needles, and hand instruments
- Know the armamentarium needed to facilitate surgical sutures in the mouth
- Understand why and how to choose a particular type of suture material
- Learn to perform and apply the most useful suturing techniques in diverse clinical situations and understand the theory of these different suturing techniques in surgical exodontia, bone grafting, implants, clot and membrane stabilization, and primary closure
- Discover how to avoid the most common suturing mistakes
- Perform full-thickness and split-thickness flaps on a pig-jaw including a GBR-procedure and the use of different types of classic and modern suture techniques as related to pre-implantological extractions

### THE 2 HOUR SUTURE & FLAP DESIGN

#### WEBINAR INCLUDES:

Pre-requisite to hands-on course & should be reviewed by all participants in preparation and prior to the course.

- The different types of suture needle designs & materials
- Biological principals of different flap designs

## Complex Endodontic Treatment and the Use of High Magnification Dentistry

AGD subject code 070

**Full Day 8 Hr. (Lecture, Demo, Hands-On)**

**8 CEU**

### COURSE DESCRIPTION:

Endodontics presents some of the most challenging scenarios in dental care, particularly in retreatment cases, post removals, and instrument retrieval. To navigate these complexities successfully, specialized techniques, tools, and technologies are essential. This course offers comprehensive training to manage both basic and complex endodontic procedures with precision using the dental microscope. Under the expert guidance of Dr. Juan Carlos Ortiz Hugues, a renowned specialist in endodontics, you'll gain valuable insights and engage in practical, hands-on sessions designed to enhance your skills and confidence in endodontic treatments. The dental microscope is a revolutionary tool in endodontics, offering unparalleled magnification, coaxial lighting, and real-time documentation capabilities. This course will teach you how to utilize this technology to improve your diagnostic accuracy and procedural outcomes, making it an indispensable part of your practice. Join us to transform your endodontic approach and achieve superior results for your patients.

### LEARNING OBJECTIVES:

- Master the Microscope: Efficiently and effectively use the microscope for both basic and complex procedures, understanding its role as the standard of care.
- Locate MB2 Canals: Techniques to locate and treat MB2 canals in maxillary molars.
- Retrieve Broken Files: Step-by-step methods for successful broken file retrieval.
- Post Removal: Guidelines and hands-on practice for removing metal and fiberglass posts.
- Perforation Management: Strategies to handle perforations with precision.
- Ergonomics: Apply ergonomic principles to enhance comfort and efficiency during procedures.
- Assistant Collaboration: Maximize the efficiency of four-handed dentistry, improving workflow and productivity.

### SPONSORS:

### DETAILED PROGRAM:

- 8:30 am – 9:00 am: Understanding Biomechanics in Microscope Dentistry (Lecture, Demo, Hands-On)
  - Ergonomics in dentistry
  - Risk factors and musculoskeletal disorders
  - Benefits of stretches and ergo breaks
  - Microscope setup and handling
- 9:00 am – 10:00 am: Systematic Positioning and Intro to Applied Microscope Dentistry (Demo, Hands-On)
  - Operator and patient positioning
- 10:00 am – 10:30 am: Motor Skill Exercises (Hands-On)
- 10:30 am – 10:45 am: Coffee Break
- 10:45 am – 11:10 am: Clinical Case Studies in Microscope Endodontics (Lecture)
- 11:10 am – 12:30 pm: Hands-On Training: Post Removal
- 12:30 pm – 1:30 pm: Lunch
- 1:30 pm – 3:30 pm: Hands-On Training: Broken File Retrieval
- 3:30 pm – 3:45 pm: Coffee Break
- 3:45 pm – 4:00 pm: Four-Handed Dentistry and Organizational Factors (Lecture)

### MATERIAL LIST:

Typodonts, Piezo tips, Artificial teeth, Laschal Endo Kits, Handpiece Motor, Burs, Basic Examination Kit

### REGISTER NOW!

Don't miss this opportunity to transform your endodontic practice with advanced skills and the latest technology. Secure your spot today and join fellow professionals in mastering the art of endodontics with the dental microscope. Reserve your space now and take the first step towards unparalleled precision in endodontic treatment.

This course is under the direction of **Juan Carlos Ortiz Hugues DDS, CEAS II, AEP**

**BIOGRAPHY:** Dr. Juan Carlos Ortiz Hugues, DDS, CEAS, AEP is an Associate Ergonomics Professional, Master of the Academy of microscope enhanced dentistry, CEAS II, and President of the Academy of microscope enhanced dentistry AMED. He is the author of the book Ergonomics applied to dental practice. He provides lectures, training, and advice in Advanced Dental Ergonomics throughout Latin America and the United States, mainly related to dental ergonomics.

**REGISTER FOR BOTH THE EXTRACTION AND SUTURING COURSES AND SAVE \$100.00**

Attendees will also receive:

Up to **15% OFF** Instruments

**FREE MEMBERSHIP**

in the Western Society of Periodontology

## Extraction & Suturing Course Pricing

### EARLY BIRD PRICE

(Up to 30 Days Prior to Event)

- EXTRACTION COURSE ..... \$895
- SUTURE COURSE ..... \$445
- TOTAL PRICE FOR BOTH COURSES ..... \$1,240

### REGULAR PRICE

(30 Days or Less Prior to Event)

- EXTRACTION COURSE ..... \$995
- SUTURE COURSE ..... \$495
- TOTAL PRICE FOR BOTH COURSES ..... \$1,390

## Complex Endodontic Treatment and the Use of High Magnification Dentistry Pricing

### EARLY BIRD PRICE

Early Bird Ends on Sept. 5, 2024

- COMPLEX ENDODONTIC TREATMENT ..... \$895

### REGULAR PRICE

(Regular price starts from Sept. 6 up to event)

- COMPLEX ENDODONTIC TREATMENT ..... \$995
