

Key Aspects of In-Office Simulation Training

- **Realistic Scenarios:** Simulate emergencies that are most likely to occur in a dental office, such as a vasovagal syncope, allergic reactions, hypoglycemia, anaphylaxis, chest pain, and seizures. 24 medical emergencies will be covered by the dental team.
- **Advanced Life Support Manikin Simulation:** Uses advanced mannequins and controlled environments to create realistic experiences.
- **Team-Based Training:** Involves the entire dental team and designates specific roles for each member to ensure everyone is prepared to act.
- **Skill Development:** Helps improve technical and communication skills needed to manage emergencies, including basic life support, airway management, and the use of emergency equipment such as an AED.

Benefits of Simulation Training

- **Increased Confidence:** Familiarity with emergency situations increases the dental team's confidence in their ability to manage them efficiently.
- **Improved Outcomes:** Offices that regularly review protocols and train for emergencies are more likely to have better outcomes
- **Regular Updates:** Annual or biannual training is recommended to keep up with evolving protocols and evidence, such as updated guidance on using ammonia inhalants.
- **Team Preparedness:** Ensures all members of the dental office are prepared to act in a crisis, not just the dentist.

Dentist Responsibilities

- **Fee for Course:** \$3,500 plus instructor's expenses (flights, hotel, etc.)
- **After registering, you will be contacted by the instructor for date of METDO/SETDO/ PETDO to take place in your office**
- **Upon completion of the course, you will receive an invoice of itemized costs from Goldman Dental Management, upon payment of these costs, CE certificates will be issued to all participants.**

BONUS

- For participating in METDO, SETDO, or PETDO, each person will receive **2 years of free Online Medical Emergency training** from Goldman Dental Management.
- At the end of the 3rd year, you may renew your online training program at the current fee OR retake the METDO/SETDO/PETDO program.
- **Over 40 CE hours available.** You will receive Mock Emergency Drills for you and your staff worth one hour each.

Courses Presented By:

Emergency Medical Consultants

Emergency Medical Consultants, Inc. is a leading Nationwide provider of quality Simulation Training programs dedicated to the dentists as well as the dental office. Based in Florida, their instructors are experts in their fields: doctors, nurses, paramedics, EMTs, etc. They have been providing Dental Training and

Emergency Simulation for over 25 years. Their goal is to provide the simulation training you need in a fun, relaxed, and interactive atmosphere, all dedicated in the name of patient safety and emergency readiness.

John B. Roberson

DMD, FACD, FICOI, FIAOMS

Developer of the R.E.A.D.Y. Program

Roberson is a Diplomate of the National Board of Anesthesiology. He has fellowships in the American College of Dentists, International Congress of Oral Implantologists, American Society of Anesthesiology, International College of Dentists, and Pierre Fauchard Academy. He writes and lectures nationwide extensively about Medical/ Sedation Emergencies and Emergency Drugs in the Dental Office. He co-authored a book on medical emergencies, has over 50 online courses on medical emergencies, sedation emergencies, and pediatric emergencies along with almost 100 articles on the subject. He is dedicated to patient safety in the dental office.

# METDO

## Medical Emergency Training in Dental Office

### 8 Hours Hands-On CE + Online Training

**METDO** is an all-day simulation training program for dentists AND their staff on medical emergencies performed in the dentist's office. It is a practice of using realistic scenarios to help dental teams confidently manage various medical emergencies.

This training improves skills through hands-on practice in a safe environment, often followed by a debriefing session to discuss performance. Instructors will use advanced life support resuscitation manikins. Solo training can have deadly consequences, But Team training can save lives during a crisis.

#### Morning Session - 8am - 12pm

These 24 medical emergencies will be covered by the instructor with each person knowing their dedicated role during each emergency.

**Medical Emergencies:** Anaphylaxis, Sudden Cardiac Arrest, Foreign Body Obstruction, Tachycardia, Cerebrovascular Accident, Local Anesthetic Toxicity, Syncope, Narcotic Overdose, Transient Ischemic Attack, Seizure, Asthmatic Attack, Acute Adrenal Insufficiency, Acute Hyperglycemia, Allergic Reactions, Angina, Apnea, Benzodiazepine Overdose, Emesis Aspiration, Ephinephrine Overdose, Hypertension, Hyperventilation, Hypotension, Myocardial Infarction

#### Afternoon Session - 1pm - 5pm

Airway emergencies and management will be taught by the instructor. Airway hierarchy will be introduced to the dental team, so everyone knows their role. High quality CPR will be reviewed and demonstrated by each person in the office.

Automated External Defibrillator use will be reviewed and demonstrated by each person in the office. Debriefing for all emergencies along with implementation of documentation will be discussed.

**Pre-Arrival Requirement:** Dental office will receive video covering 24 Medical Emergencies. Everyone must watch video, take test, and have certificate in hand before the In-Office Simulation Training begins.

# SETDO

## Sedation Emergency Training in Dental Office

### 8 Hours Hands-On CE + Online Training

**SETDO** is an all-day simulation training program for dentists AND their staff on sedation emergencies and medical emergencies performed in the dentist's office. It is a practice of using realistic scenarios to help dental teams confidently manage various sedation emergencies and medical emergencies.

This training improves skills through hands-on practice in a safe environment, often followed by a debriefing session to discuss performance. Instructors will use advanced life support resuscitation manikins. Solo training can have deadly consequences, But Team training can save lives during a crisis.

#### Morning Session - 8am - 12pm

These 24 medical emergencies and 9 sedation emergencies will be covered by the instructor with each person knowing their dedicated role during each emergency.

**Medical Emergencies:** Anaphylaxis, Sudden Cardiac Arrest, Foreign Body Obstruction, Tachycardia, Cerebrovascular Accident, Local Anesthetic Toxicity, Syncope, Narcotic Overdose, Transient Ischemic Attack, Seizure, Asthmatic Attack, Acute Adrenal Insufficiency, Acute Hyperglycemia, Allergic Reactions, Angina, Apnea, Benzodiazepine Overdose, Emesis Aspiration, Ephinephrine Overdose, Hypertension, Hyperventilation, Hypotension, Myocardial Infarction

**Sedation Emergencies:** Bradycardia, VFib/Pulseless Vtach, Malignant Hyperthermia, Laryngospasm, Apnea, Benzodiazepine Overdose, Narcotic Overdose, Hypoxia, Tachycardia

#### Afternoon Session - 1pm - 5pm

Airway emergencies and management will be taught by the instructor. Airway hierarchy will be introduced to the dental team, so everyone knows their role. High quality CPR will be reviewed and demonstrated by each person in the office.

Automated External Defibrillator use will be reviewed and demonstrated by each person in the office. Debriefing for all emergencies along with implementation of documentation will be discussed.

**Pre-Arrival Requirement:** Dental office will receive video covering 24 Medical Emergencies & a video on Sedation/Airway Emergencies. Everyone must watch videos, take tests, and have certificate in hand before the In-Office Simulation Training begins.

# PETDO

## Pediatric Emergency Training in Dental Office

### 8 Hours Hands-On CE + Online Training

**PETDO** is an all-day simulation training program for dentists AND their staff on pediatric emergencies and medical emergencies performed in the dentist's office. It is a practice of using realistic scenarios to help dental teams confidently manage various pediatric emergencies and medical emergencies.

This training improves skills through hands-on practice in a safe environment, often followed by a debriefing session to discuss performance. Instructors will use advanced life support resuscitation manikins. Solo training can have deadly consequences, But Team training can save lives during a crisis.

#### Morning Session - 8am - 12pm

These 24 medical emergencies and 12 pediatric emergencies will be covered by the instructor with each person knowing their dedicated role during each emergency.

**Medical Emergencies:** Anaphylaxis, Sudden Cardiac Arrest, Foreign Body Obstruction, Tachycardia, Cerebrovascular Accident, Local Anesthetic Toxicity, Syncope, Narcotic Overdose, Transient Ischemic Attack, Seizure, Asthmatic Attack, Acute Adrenal Insufficiency, Acute Hyperglycemia, Allergic Reactions, Angina, Apnea, Benzodiazepine Overdose, Emesis Aspiration, Ephinephrine Overdose, Hypertension, Hyperventilation, Hypotension, Myocardial Infarction

**Pediatric Emergencies:** Anaphylaxis, Allergic Reaction, Asthmatic Attack, Benzodiazepine Overdose, Ephinephrine Overdose, Foreign Body Obstruction, Hypoglycemia, Laryngospasm, Local Anesthetic Toxicity, Narcotic Overdose, Seizures, Syncope

#### Afternoon Session - 1pm - 5pm

Airway emergencies and management will be taught by the instructor. Airway hierarchy will be introduced to the dental team, so everyone knows their role. High quality CPR will be reviewed and demonstrated by each person in the office.

Automated External Defibrillator use will be reviewed and demonstrated by each person in the office. Debriefing for all emergencies along with implementation of documentation will be discussed.

**Pre-Arrival Requirement:** Dental office will receive video covering 24 Medical Emergencies & a video on Pediatric Airway/Sedation/Medical Emergencies. Everyone must watch videos, take tests, and have certificate in hand before the In-Office Simulation Training begins.
