

Hands-on Workshop New Trends in PRF Therapy

Sunday • 8am-5pm • Tampa, FL • Oct 4, 2026

COURSE SCHEDULE

Part 1 (8:30am-10:30am):

Biology of Wound Healing. Understand the importance of vascularization for both soft and hard tissues. Learn the history of PRF and the improvements made over the years from PRP towards Bio-PRF.

Break (10:30am-10:45am)

Part 2 (10:45am-12:00pm):

Biological background of PRF for various clinical uses. Understand how lower centrifugation speeds (g-force) using horizontal centrifugation results in a superior fibrin scaffold with more platelet and leukocytes. Understand growth factor release and optimization of the PRF centrifuge to improve regeneration. Importance of PRF tubes for the fabrication of PRF.

Lunch (12:00pm-1:00pm)

Part 3 (1:00pm-2:45pm):

Clinical indications of PRF in dentistry. Discussion over its potential use in Extraction Socket Grafting, Sinus Augmentation Procedures, Gingival Recessions, Intrabony/Furcation Defect Regeneration, Implant Dentistry, Soft Tissue Management, and its use in Facial Esthetics.

Break (2:45pm-3:00pm)

Part 4 (3:00pm-5:00pm):

Hands on Practice! Learn phlebotomy, make PRF membranes, sticky bone and the extended-PRF BioHeat membranes.

TWO HANDS-ON WORKSHOPS TAMPA, FL • OCT 2-4, 2026

Level 2 Aesthetic Botox & Introduction to Dermal Fillers

Presented by:
Jarrod Cornehl
DDS

**FRIDAY & SATURDAY
OCTOBER 2-3, 2026**

Dr. Jarrod Cornehl, a 2002 honors graduate of the University of Texas Health Science Center at San Antonio, is an accomplished restorative and cosmetic dentist and leading aesthetic medicine expert. He is recognized for his successful combination treatments using dermal fillers, toxins, PDO threads, and the application of PRF with laser therapy, as well as his unique approach to TMD pain management. Dr. Cornehl specializes in non-surgical treatments for TMJ disorders and myofascial pain, utilizing PRF, photobiomodulation, trigger point injections, and neuromodulators. As the founder and lead educator at Regenerative Training Academy, he trains dental and medical professionals in cutting edge PRF techniques for TMD pain relief and facial rejuvenation.

Hands-On Workshop New Trends in PRF Therapy

Presented by:
Richard J. Miron
DDS, MSc, PhD

SUNDAY, OCTOBER 4, 2026

Dr. Richard Miron is currently lead educator and researcher at Advanced PRF Education and an Adjunct Visiting Faculty in the department of Periodontology in Bern, Switzerland where he completed his PhD studies since 2009. He has currently published over 400 peer-reviewed articles and is currently the most cited dental researcher in private practice in the United States with over 4000 citations yearly to his work. For the past 10 years, Dr. Miron has also been recognized by Dentistry Today as being one of the top 100 CE educators in the country and the youngest to ever make the list. He is the #1 ranked researcher on Platelet-Rich Fibrin therapy as per Expertscape independent review and developed many novel technologies and protocols including the injectable liquid-PRF formulations, optimized protocols utilizing horizontal centrifugation, and the longer lasting form of PRF termed extended-PRF through the BioHeat process. He has written 10 textbooks including his best-sellers titled: "Next Generation Biomaterials for Bone and Periodontal Regeneration", "Understanding Platelet Rich Fibrin" and "Modern Implant Dentistry". He remains the only author in the world to have 3 separate textbooks finish #1 most sold in the world in any given year. Dr. Miron has been awarded many international prizes in dentistry including the ITI Andre Schroeder Prize, the IADR Young Investigator of the Year in the field of Implant Dentistry as well as the IADR Socransky Research award in the field of Periodontology.

Level 2 Aesthetic Botox & Introduction to Dermal Fillers

Dr. Jarrod
Cornehl
DDS

Fri & Sat • 8am-5pm
Tampa, FL • Oct 2-3, 2026

16
HOURS
HANDS-ON
CE

COURSE DESCRIPTION:

This two-day hands-on course builds on foundational training and focuses on advanced Botox injection techniques and introductory dermal filler applications. Participants will learn to treat areas such as bunny lines, brow lift, gummy smile, lip flip, downturned oral commissures, pebbled chin, and platysma bands, as well as dermal filler injection sites for common perioral volume loss concerns including nasolabial folds, marionette lines, oral commissures, and loss of interdental papilla (black triangles).

The program emphasizes essential anatomy, muscle function, sterile technique, and safe injection practices. Attendees will work on their own live patient under instructor guidance, focusing on assessment, facial mapping, and personalized treatment planning.

LEARNING OBJECTIVES:

- Understand indications and mechanisms of botulinum toxins and hyaluronic acid fillers.
- Apply proper sterile techniques for product preparation and handling.
- Perform safe, precise injections through guided hands-on practice.
- Strengthen knowledge of facial anatomy and key landmarks.
- Treat advanced Botox areas: bunny lines (nasalis), eyebrow sculpting / brow lift, gummy smile, lip flip, downturned oral commissures (DAO), pebbled chin (mentalis), platysma bands, and facial slimming (masseters).
- Use dermal fillers for perioral volume loss, nasolabial folds, marionette lines, oral commissures/angular cheilitis, and interdental papilla.
- Review foundational Botox areas: glabella, crow's feet, and forehead.
- Conduct effective consultations and set clear expectations.
- Understand how neuromodulators complement fillers, platelet-rich fibrin, microneedling, and lasers.
- Access treatment forms, consents, and fee structure guidance.

ADDITIONAL DETAILS:

- Prerequisite: Completion of a Level 1 / Foundational Botox course
- Participants are encouraged to bring their own live patient for personalized instructor guidance.
- Botulinum toxin (\$6/unit) and dermal filler (\$300/syringe) are available for purchase and not included in the course registration fee.

Hands-on Workshop: New Trends in PRF Therapy

Dr. Richard
Miron
DDS, MSc, PhD

Sunday • 8am-5pm
Tampa, FL • Oct 4, 2026

8
HOURS
HANDS-ON
CE

COURSE DESCRIPTION:

This hands-on course will cover all the new advancements made with respect to the newest formulations of platelet concentrates. These will cover how to make custom-shaped PRF grafts, how to better concentrate liquid-PRF and will provide a better understanding for optimization of the protocols utilized in every day dental practice.

Thereafter, the Bio-Heat technology will be presented. This will cover the heating steps necessary to extend the working properties of PRF from a fast-resorbing 2-3 week membrane towards a membrane that lasts 4-6 months. Various protocols will be demonstrated whereby clinicians will learn how to make an extended-PRF membrane that lasts 4-6 months, as well as how to make a novel sticky bone that contains an outer e-PRF membrane that may be utilized for ridge augmentation procedures.

LEARNING OBJECTIVES:

- Optimization of protocols for any centrifugation device
- Update on Bio-Heat technology and the ability to extend the working properties of PRF from 2-3 weeks to 4-6 months
- Improve cell and growth factor release using concentrated-PRF (C-PRF) protocols when compared to traditional injectable-PRF (i-PRF) on any centrifugation device
- Launch of the Bio-Cool technology
- Importance of PRF tubes for the fabrication of PRF
- Coupon code for Free access to an online 8CE program at www.prf-edu.com
