

LOCAL ANESTHESIA FOR TODAY'S DENTAL HYGIENIST CERTIFICATION COURSE

COURSE DESCRIPTION

Today's dental hygienist must be knowledgeable in all aspects of the hygiene profession including providing local anesthesia administration to provide comfort to the dental patient. Presented by Periodontist Laura Braswell, this course provides the participant with the mechanics to create a positive patient environment with competent pain and anxiety management.

All aspects of local anesthesia are explored from pharmacology to anatomy and managing all dental patients requiring local anesthesia. Special emphasis is placed on administering anesthesia to a periodontal patient. Practice management aspects are provided with "pearls" to utilize quality local anesthesia administration by the dental hygienist as a practice builder involving today's demanding patient.

As with any hands-on training course, the participant should realize that competency, and ultimately proficiency, in the administration of local anesthesia requires repeated administration and periodic self-reeducation.

Participants are required to actively engage in gaining patient health & history. Therefore, consult with a physician for controlled blood pressure and overall health.

GOALS

The goals of this class are to assist the dental hygienist to become:

- Knowledgeable in the use and administration of local anesthetics in all aspects of dentistry including periodontal patients
- Knowledgeable in the pharmacology, neurophysiology, neuro-chemistry and anatomy related to the administration of local anesthetics in a practical common sense approach
- Knowledgeable and competent in the physical and psychological evaluation of the patient prior to receiving local anesthetic or dental treatment
- Knowledgeable in the side effects, complications and the management of those problems associated with local anesthetics to maintain safety as a priority

LEARNING OBJECTIVES

At the conclusion of the course, the participant will be trained in:

- Scope of pain and anxiety control
- Neurophysiology
- Pharmacology of local anesthetics and vasoconstrictors
- Armamentarium
- Physical and psychological evaluation
- Anatomic considerations, clinical application and supplemental injection techniques
- Local and systemic complications
- Comfort for the dental patient

PREREQUISITES, MATERIALS & REQUIREMENTS FOR LOCAL ANESTHESIA

- 2 weeks prior to the course you must have completed:
- Purchase and Read – Local Anesthesia For Dental Professionals (2nd Edition) by Bassett, Di Marco and Naughton. (Amazon)
- Complete Online Coursework (Link found in digital enrollment receipt.)

Local Anesthesia for Dental Professionals

Students are required to receive an injection of local anesthesia as part of this course. Being in good health is expected in order to receive an injection, and blood pressure must be controlled. If you have a medical condition that prevents you from receiving local anesthesia, a note from a physician should be provided as an exemption.

This course is 60 hours which is what is needed and approved by the Georgia Board of Dentistry. Virtual learning is provided by the University of Florida College of Dentistry.

FAQS

- Students are required to be licensed dental hygienists in good standing
- Students must complete all online trainings at least 2 weeks before the class start date
- Students are required to receive local anesthesia injections as a part of the course
- Students must possess up to date CPR certification and provide a copy before the class begins
- If a student is medically unable to receive an injection, they must provide medical documentation from a physician to be given exemption from local anesthesia injection

INSTRUCTOR:

Laura Braswell, DDS

Dr. Laura Braswell is a periodontist working with Dental Specialists of Buckhead in Atlanta Georgia. She was on faculty at the Emory University School of Dentistry and currently teaches in the periodontal residency program at The Dental College of Georgia at Augusta University. She is the staff dentist for Zoo Atlanta, The Georgia Aquarium and several non-human primate facilities. She is an Honorary Fellow of the American Academy of Veterinary Dentistry. As a Charter Member, a board member and a Master in the Academy of Laser Dentistry, she truly has a passion for the use of lasers in Periodontology.
